

Come and establish your practice in the heart of the Olympic Village community, near the new St. Paul's Hospital. Perfect timing to get established as the hospital transitions to its new facilities. Come and be part of the initial team at Tandem Clinic!

Tandem Clinic is a brand-new clinic opening in the Olympic Village. We are looking for a team of midwives to join into our group of healthcare practitioners. We will have 3 naturopaths, 2 RMTs and yourselves working together collaboratively to serve the Olympic Village community & the lower mainland. Planned opening is September 2017.

Our clinic will have a strong focus on women's health and fertility. We have already done the market research and the community is calling for midwifery services. There are approximately 32,000 people living within a 1km ring of the clinic's location and that number is growing continually. A large percentage of community are young families and young professionals thinking of starting families.

We are offering a newly designed space with lab capabilities onsite, full reception/MOA services, EMR & Billing. We are offering a complete compensation package. Please email hr@tandemclinic.com if you are interested in applying.
