

MIDWIVES JOB OPPORTUNITIES IN AUCKLAND, NEW ZEALAND

ICG Medical is looking for passionate midwives to join our team in North Auckland, New Zealand. Our client has around 4000 births a year and offers both primary and secondary maternity care, to a range of women from different cultures and backgrounds. The work is diverse and interesting, and they strive to ensure that all women, regardless of complexity, have a fulfilling birth experience.

You will be working within a supportive team who have a great reputation for collegiality and mutual respect. Our client encourages midwives to develop professionally and take on leadership roles within the service. The hospital is highly innovative and has received a number of awards for leading excellence in maternity care.

Our client offers a range of shift patterns to ensure that you have a satisfying work-life balance. Their orientation is individually tailored to ensure that you are fully supported as you become familiar with our service and systems.

OUR BENEFITS

With the district's rapid growth, our client has a wide range of career options, providing many opportunities for personal and professional growth in a supportive and professionally fulfilling environment.

- Superannuation - pension fund contributions
- Global Mobility Consultant (who is Licensed by the Immigration Advisors Authority) to support you with your Immigration, Registration and relocation requirements
- Relocation Package (where applicable)
- 6 Months Free Health Cover (Must apply within 4 weeks of starting)
- In-house Career Development Service to support you in developing your career in health
- Free Employment Assistance Programme
- On-going professional development - certification & workplace training
- Free Flu Vaccinations
- Flexibility in work options to suit lifestyle in various departments
- Discounts at some great companies (Identification is required to obtain the discount)
- Free 24/7 Gym

KEY RESPONSIBILITIES

The scope of practice for registered midwives outlines that these professionals are responsible for the delivery of safe and effective perinatal care. Midwives

- attend to the physiological process of pregnancy, birth and adaptation to parenthood identify deviations from the normal pathway, and work alongside obstetricians to deliver packages of care for women with complex pregnancies
- are the first responders in obstetric emergencies and provide life preserving care
- such as neonatal resuscitation, management of postpartum haemorrhage and maternal collapse
- are key in supporting and protecting mother- infant attachment which is critical for both maternal and child mental health
- provide midwifery care to women and babies within the maternity service and to perform this as part of the multidisciplinary team
