Other Information

We are looking for a locum midwife to cover a leave period of 6 months with the possibility of extension. Either new or general registrants are invited to apply.

Model: team of two, with every second weekend off. There is also good support from local physicians to cover call if need ever be. Nurse home birth back ups: 2 - 3 available. Home birth rate: 1:5

We often get called in as 'baby doc' / MRP for baby at births in the event that the client has no family physician in town (often they are from surrounding communities and birth in Dawson Creek) or asked to provide postpartum-only care (either maternity nurses or family physician that feel client requires increased postpartum care).

Outreaches twice a month to Chetwynd Hospital (about an hour's drive and we are yet to determine whether this program will continue during winter months).

Billings: 50/50 split with overhead \$500-\$700/month. Currently no medical office assistant part of collective, hence the low overhead. We bill directly through our EMR (Acurro).

About the hospital: DCDH is a level 1 hospital with one OBGYN and 3 GP-surgeons that cover obstetric calls. Anesthesia are performed by GP-Anesthetists. The hospital has no pediatrician or NICU and averages about 350 births per month. Maternity nursing staff are very welcoming and extremely helpful.
