

Summer Locum Position, Pomegranate Community Midwives
Vancouver, BC

Just when you have the perfect schedule... SUMMER VACATION ARRIVES.

We are seeking a fabulous summer locum for 8-10 weeks this summer, starting between July 15-22, 2020, ending between Sept 23-Sept 30, 2020. The successful candidate ideally is a Registered Midwife, but we will consider New Registrants with a strong background in OSCAR charting, homebirth, and the BC midwifery system.

We are a team of 3.5 midwives, taking a caseload of approximately 12 clients per month. The successful candidate would work collaboratively on the team, with a willingness to help out the larger team at Pomegranate as needed. Typical workload is one 9 hour day of clinic and two to three 24 hour call shifts per week. Our team has a 35-40% homebirth rate and comfort with homebirth is a must. We strongly believe in informed choice and supporting choices that may fall outside routine community standards. The successful applicant will be hard working and passionate about birth and women led care!

Pomegranate has two other teams of midwives who are available to help out with back up for homebirths, coverage for urgent home visits if you are at a birth, and labour sitting as needed. You would be well supported by our extended team! We are all committed to supporting one another with backup, protected time off and set vacation times. We use OSCAR for all our charting - experience with this, or another similar platform, is a must.

Please send CVs and inquiries to all:
