

Malachite Midwives Is Hiring – January 2021

Malachite Midwives in beautiful Kelowna, BC is seeking a full-time midwife to join our group in January 2021.

The position is a locum opportunity (minimum 6-months but ideal would be 1-year) with the possibility of a long-term position.

We are a team of 4 midwives that work in both solo and team-based models. Our practice operates out of a beautiful home in a lively neighbourhood close to the hospital, hiking and biking trails, and downtown. We have a part-time MOA who does an excellent job of supporting us. We use OSCAR for electronic medical records and aspire to minimize our footprint. The shared clinic space offers two comfortable clinic rooms and a lovely birthing suite for use by eligible clients seeking an alternative home birth location. Our home birth rate ranges from 30-50%. Our clinic is minutes away from Kelowna General Hospital, which is a level 2 facility. Our interprofessional relationships are strong, including very supportive nursing staff, and we pride ourselves on a cohesive midwifery community in town.

The successful applicant will work in a full-time team of two, sharing a caseload of 8-10 clients per month. Long-term positions offer up to 2 months of holiday during the contract. Regular off-call time is negotiated within teams and typically includes a week-on/week off-call style rotation, with additional time off when possible.

Midwives can visit our website at www.malachitemidwives.ca to learn more about us. Please email us letters of interest with CVs to mail@malachitemidwives.ca by **May 15th, 2020**.

We have a great thing going on here and encourage you to apply!
