

TRANSITIONS MIDWIFERY SEEKING A LOCUM MIDWIFE ONE YEAR TERM

Transitions Midwifery is seeking a full time, full scope, registered midwife for our Maple Ridge practice. You will be part of a four midwife shared care team. We enjoy a caseload of 12-20 clients most months, with many return clients, and a home birth rate of approximately 20 percent. Our schedule supports one week off per month most of the year, in addition to a three day weekend per month and three weeks off once per year. You may arrange independently with the other midwives to trade weeks in order to have 2 weeks off. Currently we are doing 24 hour call periods. The midwives of Transitions Midwifery have many years combined experience in the BC model, making this an ideal opportunity for a new graduate from any province.

We practice largely out of Ridge Meadows Hospital, a level one centre, with privileges at Royal Columbian Hospital for tertiary care cases. RMH features full obstetric and pediatric services and a collegial working environment with full nursing support.

Our catchment area covers Maple Ridge, Pitt Meadows and some of the Tri-Cities. It is a growing, youthful community with many recreational opportunities and a lower cost of living. Approximately one hour from Vancouver, housing costs are significantly reduced, while still providing good access for your time off.

Our office in Maple Ridge has full time administrative support, sometimes working remotely. On call midwives are contacted by clients using Telmediq. We utilize OSCAR electronic medical records.

There is a possibility of a second year or other opportunity after the initial locum term. Financial compensation model has some flexibility. Please feel free to contact us to discuss short term locum arrangements as well.

Expressions of interest with CV to:
