Making an informed choice decision as an Indigenous person

Knowledge and Trust

Indigenous peoples have had negative experiences with infectious diseases and vaccination, including mass deaths, vaccine experimentation and lack of access to public health measures. These experiences can result in a lack of trust in health care providers.

Building trust is part of midwifery care. Midwives offer information and support you to make the best decisions for you and your family.

Talk to your midwife. We're here to listen and answer your questions.
