Hello all,

We are looking for a locum to join our shared care practice in Mission which is in the heart of the Fraser Valley--close to Vancouver and endless recreational opportunities. The dates of the locum would be January 1, 2022, to June 30, 2022, but both start and end dates can be flexible. We will also consider applicants who are interested but only able to work a portion of this time period.

Mission is a wonderful place to live and work, with a small town feel but with easy access to the city an hour away. You will be joining 3 other full-time midwives to work as a team of 4. We work as a shared care group, booking on average 4 births per month per midwife. This model allows ample time off call to pursue the many activities the area has to offer.

Our clinic is located in downtown Mission in a restored heritage house, with excellent administration support.

We attend hospital births at Abbotsford Regional Hospital which was built in 2008 and features single room maternity care and 3 tub rooms. We have 24 hour OB and Pediatric availability at our Level 2 hospital, and are lucky to have excellent relationships with our OB and Pediatrician colleagues as well as our nursing staff. As well, we are very committed to having a fun, fair and supportive environment within our team.

For more information on our clinic and practice please visit our website: www.missionmidwifery.com

Please contact us with any questions and to send in a resume: missionmidwife@gmail.com

Sincerely,

Nooshin Nikpartow and Shannon Ruley
Mission, BC
